B42GN

Economy Recirculating Glasswasher

Suits all popular Wash Rack Sizes:

The large wash chamber has been designed to accept all popular wash rack sizes including: 400 x 400mm, 400 x 430mm as well as 430 x 360mm. A generous 295mm clear chamber height easily caters for tall stem glassware, jugs and plates. An impact resistant 400 x 400mm polypropylene rack is supplied as standard.

Optional polypropylene racks with customised individual compartments for high cost glassware are also available.

Fully Automatic Operation:

Simply select an appropriate wash cycle time and push "start" button. Your Eswood dishwasher will do the rest, from wash to final rinse, including detergent injection. Upper and lower rotating wash arms with multiple jets ensure maximum wash and rinse coverage. The boost heater is thermostatically controlled and interlocked to machine operation to ensure correct sanitising every time. The B42GN has an additional cold rinse cycle to cool glasses after sanitising.

Operator safety is assured as the machine cannot operate until the door is securely closed.

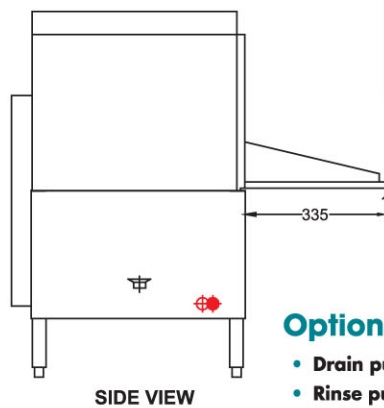

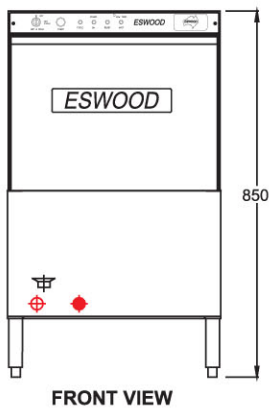

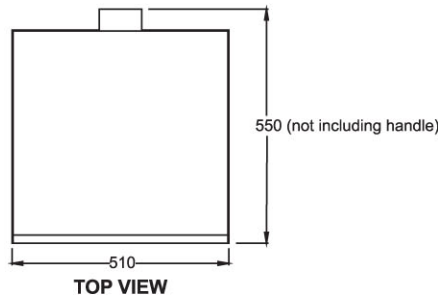

Designed and Built to Eswood's Quality Endorsed Standards:

Eswood dishwashers are Australian designed and manufactured to meet your needs. They comply with all the Australian Health and Plumbing Safety regulations. The long-life stainless steel body has an attractive and easy to clean satin finish. All internal components are manufactured from selected high durable materials to ensure outstanding service under constant commercial use.

Easy Installation:

Height adjustable legs eliminate the need for a plinth or sealing to the floor to meet health regulations. Just connect the inlet hoses to hot and cold taps, connect the outlet to a drain and plug the cord into a 15amp, 240V power outlet.

400 x 400 Racks

MODEL: B42GN Specifications:

Dimensions (WxDxH):	510 x 550 x 850 mm
Depth with door open:	885 mm
Rack Size - R402 (WxD):	400 x 400
